

**Product ID: Body/Metal Filler**

**Product Name: ALSI12**

**Quantity: 1 litre (12 per case)**

## **ALSI 12 – Incredibly strong and easy to use filler.**

Most METAL OR BODY FILLERS absorb moisture and shrink. ALSI 12 is the only filler, which will not absorb moisture or shrink. It is used by ROLL ROYCE, the FRENCH ARMED SERVICES and other major manufacturers such as CITROEN, MINERVE, FUTURE DESIGN INC. and quality restoration bodyshops all over the world.

Guaranteed to make your finish look beautiful and last for years.

Alsi 12 is made out of special alloys, which have the added advantage that they resist very high temperatures and can also be used to repair engine block cracks and rusted tail pipes.

### **Features:**

- Extremely strong and light
- Will not shrink
- Will not absorb moisture
- Easy to use. Sands easily
- Can be drilled, nailed, tapped & threaded
- Used to repair all metals including galvanized sheet metal and aluminium
- Resists temperatures up to 500 degrees Celsius.
- Great for powder coating applications
- Will not clog up the sandpaper
- Will repair engine block
- Used for areas that require large volume fillings as well as areas that are rusted, cracked or oxidized

### **Applications:**

Areas that require volume filling and strength. Oxidized areas on cars, on metal and galvanized sheet metal, wheel housings, rear wing welds, wind shield bays, sunroof areas, on bottom of cars, side panels and roofs. Exhaust systems, hydrocarbon tanks, can repair some batteries (will withstand some acids), craters and cracks in motor blocks, can repair rifled cylinders, can be drilled and threaded as required, for the repair of aircraft fuselages as well as many other industrial applications and the sealing of pipes.
