

Product ID: Car-Boat Compound
Product Name: MenzernaSA34A
Quantity: 1 quart

Description:

Menzerna Powergloss S34A is a heavy duty compound that still behaves like a light-duty polish! It contains more aggressive, clustered, milled aluminum oxide particles than used in Menzerna Intensive Polish. It contains twice as many particles as the intensive polish which gives it double the cutting power yet creates little to no increase in compounding haze!

- Powergloss S34A is a water-based formula containing no silicones or fillers
- Quickly and effectively removes 1000-1500 grit sanding scratches on fresh paint
- Completely removes swirls
- Removes scratches
- Removes water spots
- Is a professional compound
- Has double the cutting power of other compounds
- Leaves little or no compounding haze
- Can be used with dual-action polishers
- Designed for optimum results with circular polishers
- Uses less product
- Produces less residue
- Uses only milled aluminum oxide particles as its abrasive agent
