

Product ID: Detail Polish
Product Name: QUICKGLOSS707
Quantity: 500 ml

QUICK-GLOSS 707 - Instant detailer

A superb hi gloss quick detail polish

Finally a spray on product that is not a watered down version of the actual polish. Most spray on polishes have been diluted from the original formula and packaged in spray bottles for consumers. Customers do not get the same shine and feel cheated. Most spray on polishes also leave the surface looking hazy and not quite polished or waxed.

Quick Gloss has the same ingredients as our award winning Hi Gloss and is not a watered down version of Hi Gloss. It was completely reformulated with all the same major ingredients to make it more easily sprayable, but without adding water to the mix. Quick Gloss leaves a super high shine on the surface and is the perfect final step polish for those wanting a quick high shine. Also great for those exhibiting at car shows as well as for car dealers who need to keep their cars shining and remove fingerprints easily and quickly from the cars in their show rooms.

Features:

- Ecological "Wash & Shine"
- Waterless Car/Marine/RV and Aviation Care
- Biodegradable and environmentally friendly
