Qty: Aerosols/Quarts/Gallons/Drums

RUBBERBOND

Color for Hypalon, rubberized substrates (i.e.: rubberized non slip flooring rubber and inflatable dinghies). This unique product will now let you recolor rubber surfaces where it was not possible before. Our customer include rubber playground manufacturers, rubber roof tops, urethane coated nylon material, rubber doors etc. This versatile product is abrasion resistant and will not peel, crack or flake off.

- Non toxic
- Single pack
- Chemically bonds to Hypalon and other rubber substrates easily
- UV stable
- Abrasion resistant
- Will not crack, peel or flake
- Flexes with substrate so a boat can be deflated and dry stored in winter without problems.

Applications

Hypalon Boats, Rubber doors and many other rubberized substrates.

Not recommended for vinyl or plastic surfaces.
